

40x48 Export – Closed Deck Pallet

This cost effective closed deck export pallet is made from 100% recycled post industrial materials that meet all international shipping standards. It's resistant to pest infestation, mold and mildew. Low cost materials and economical nesting and shipping make this pallet perfectly suited for one way trips. Optional snap-on bottom runners are available for stackable requirements.

Specifications	Dimensions				Load Ratings (lbs.)			
	Width	Length	Height	Weight (lbs.)	Static	Dynamic	Edge Racking	Supported Racking
Model 4048 Export Closed Deck	40in.	48in.	5in.	17	4,000	1,200	N/A	N/A

Applications:

- Distribution
- Warehousing/storage
- Work in process

Definitions:

Static Load Rating- defines the maximum load on a pallet that remains immobile for extended periods and does not change.

Dynamic Load Rating- defines the maximum load on a pallet while in motion.

Edge Racking- commonly referred to as unsupported racking where the only contact between pallet and rack is on the outside edge on two opposite side.

Supported Racking- racking that provides bottom support to the outside as well as the inside of the pallet. Center bars and/or wire mesh decking are typical examples of inside support.
